SURESH KUMAR R

ASPIRING SOFTWARE ENGINEER

ABOUT ME

Highly motivated and eager to apply my academic knowledge in software engineering and project management to real-world applications. I am driven to learn, collaborate with cross-functional teams, and contribute to innovative software solutions.

EDUCATION

(2022-2023) Bachelor of Computer Application

Vinayaga college of arts and science | GCPA -7.6

(2021-2022) Higher Secondary Education

Gov Boys Hr secondary school | Percentage - 63%

(2019-2020) Secondary Education

Gov Boys Hr secondary school | Percentage - 57%

PROJECT

Online Book Store Using PHP

Technologies: PHP | XAMPP | phpMyAdmin | HTML | CSS

- Developed a fully functional Online Book Store web application using PHP as the backend scripting language with XAMPP as the local server environment.
- Designed and managed the database using phpMyAdmin (MySQL) to store book details, user information, and order records efficiently.
- Built a responsive front end using HTML and CSS to enhance the user browsing experience across devices.
- Implemented features such as user registration and login, book listing with categories, search functionality, shopping cart, and order management.
- Handled server-side form validation and secure database queries to ensure data integrity and basic application security.
- Tested the complete application for functionality, usability, and bug fixes before final deployment on the local server.

INTERNSHIP - 2024

Web Developer - Skill Up Tech Solution

- HTML, CSS, JavaScript: Developing and maintaining the front end using HTML, CSS, and JavaScript to create interactive and visually appealing websites.
- Responsive Design: Ensuring that the site functions well on various devices and screen sizes.
- Building Structure with HTML: Creating the skeleton and layout of web pages using semantic tags for accessibility.
- Styling with CSS: Applying designs, colors, layouts, and responsive techniques compatible across devices.
- Adding Interactivity with JavaScript: Making the website interactive by handling user actions (e.g., clicks, form submissions).
